Diploma Information Technology | Central University of Technology

Matric Certificate | Penryn

Professional Summary

I am an IT Support Technician with hands on ICT experience covering desktop support, hardware and software installations, network troubleshooting, and IT administrative functions. Experienced in logging and resolving incidents through service desk ticketing systems, provisioning and configuring desktops and laptops, installing peripherals, and supporting staff and end users in fast paced environments.

Professional Experience

IT Support Technician Intern | eThekweni Municipality *February 2026 – Present*

Desktop Support and Incident Management

- Answer, evaluate and prioritise support requests, providing remote and in person desktop support to end users across municipal sites.
- Utilize CA Service Desk Manager to manage, track, and document support tickets, prioritizing tasks based on urgency and impact.
- Provision and configure Windows workstations for end-users, ensuring devices are joined to the government domain and compliant with organizational security policies.
- Manage user account configurations, password resets, and hostname assignments using Microsoft Entra ID (Azure AD).

Software and Hardware Installation and Support

- Install, configure and troubleshoot hardware and peripheral components including monitors, keyboards, printers and disk drives.
- Conduct hardware assessments and repairs to keep devices operable, minimising downtime for end users.
- Set up and troubleshoot network and VPN connectivity, printers, and Wi-Fi to ensure secure and reliable access for staff.

IT Administrative Functions

- Performed data migration and backup/restore operations when provisioning new workstations and upgrading existing devices, ensuring zero data loss during transitions.
- Contribute to server maintenance activities and ongoing infrastructure stability as part of day to day IT operations support.
- Conducted data recovery for end-users, retrieving lost or corrupted files from local drives, cloud storage, and backups.
- Executed password recovery procedures using Microsoft Entra ID, including secure account unlocks, multi-factor authentication resets, and self-service portal support.

Technical Support and Systems Administration

- Installed, configured and maintained Windows and macOS operating systems, and managed Active Directory and Office 365 accounts for role-based access.
- Troubleshoot hardware including routers, switches and workstations to keep equipment running at optimal performance.
- Performed system imaging, disk partitioning and BIOS/UEFI configuration for secure device deployments.

Network and Security Support

- Configured VLANs, access control lists, firewalls and intrusion detection systems, and designed multi router network topologies.
- Conducted vulnerability assessments and monitored security logs using Nmap and Wireshark to identify and resolve issues.
- Compiled clear technical reports on findings and recommended fixes for review by management, and documented incident response and root cause analysis.

Scripting, Web Development & AI Automation

- Developed Python scripts for network discovery and log parsing.
- Prototyped an AI-powered vulnerability detection system.
- Automated system diagnostics using bash scripts.
- Developed web applications using HTML, CSS, and JavaScript for network discovery and log parsing and security dashboard visualisation.
- Automated system diagnostics and patch management using Bash and PowerShell scripts.
- Integrated Rest APIs for threat intelligence feeds to enhance detection capabilities.

Incident Response & Reporting

- Responded to security incidents by performing root cause analysis, containment, eradication, and recovery procedures.
- Compiled detailed technical reports on vulnerability findings, attack simulations, and recommended mitigation strategies for team and management review.
- Monitored and analysed security logs using Wireshark and custom Python scripts to detect anomalies and support rapid threat mitigation.

Cash Handling & Payment Processing

- Processed transactions using MPOS systems, handling cash, credit/debit payments, and digital wallets with accuracy.
- Delivered personalized service to diverse customers, ensuring satisfaction and repeat business.
- Issued refunds, processed exchanges, and resolved payment discrepancies in compliance with company policies.

Communication & Coordination

- Liaised with national teams for stock transfers and high-demand item fulfilment.
- Managed customer communication via phone and email for special orders and follow-ups.

Data Analysis & Reporting

- Built interactive Power BI dashboards to track weekly sales, bestsellers, and KPIs.
- Conducted market and competitor research to inform pricing and promotion strategies.
- Delivered insights to management to support stock planning and marketing campaigns.

Inventory & Operations Optimization

- Programmed a barcode inventory tracking system using HTML, CSS, and JavaScript to reduce manual errors and enable real-time visibility.
- Coordinated stock movement and logistics across multiple store locations.
- Performed stock take operations minimising stock discrepancies during audits.

Customer Service & Sales Support

- Assisted shoppers by locating products throughout the store and providing directions.
- Supported cashiers by resolving issues like damaged goods, missing barcodes, and price discrepancies.

Operations & Inventory Management

- Returned unpurchased items to correct shelf locations to maintain store organization.
- Assisted with stock rotation to minimize waste and optimize product freshness.
- Collaborated with stockroom staff to verify product availability for customers.

Logistics & Safety Compliance

- Packed customer purchases efficiently into plastic/tote bags or trolleys, handling fragile/heavy items with care.
- Reported equipment issues and potential hazards to management to ensure safety.
