Professional Experience

Makro

Packer / Customer Service Representative | December 2019 – January 2020

Customer Service & Sales Support

- Assisted shoppers by locating products throughout the store and providing directions
- Provided additional support to elderly or disabled customers with bagging and loading items
- Supported cashiers by resolving issues like damaged goods, missing barcodes, and price discrepancies
- Directed customers to checkout lines during peak times to optimize flow

Operations & Inventory Management

- Returned unpurchased items to correct shelf locations to maintain store organization
- Assisted with stock rotation to minimize waste and optimize product freshness
- Collaborated with stockroom staff to verify product availability for customers
- Restocked register areas to ensure smooth checkout operations

Logistics & Safety Compliance

- Packed customer purchases efficiently into plastic/tote bags or trolleys, handling fragile/heavy items with care
- Maintained packing area cleanliness by disposing of damaged packaging and debris
- Reported equipment issues and potential hazards to management to ensure safety

Pandora

Sales Associate / Administrative Assistant | 2IC | May 2024 – Present

Cash Handling & Payment Processing

- Processed transactions efficiently using MPOS systems, handling cash, credit/debit payments, and digital wallets with accuracy
- Performed precise cash counting, end-of-day reconciliations, and maintained till accuracy, minimizing discrepancies
- Issued refunds, processed exchanges, and resolved payment discrepancies in compliance with company policies

Technical Skills

- Full-Stack Web Development – built inventory/sales web apps (HTML, CSS, JavaScript, Node.js, MongoDB)
- Power BI – created dynamic dashboards and automated reports
- Microsoft Excel – used for data tracking, report generation, KPI analysis
- Custom Inventory System – designed a barcode-based inventory tracking tool
- IT Support – performed hardware checks, printer setup, OS updates, and in-store tech maintenance
- Communication Systems – email handling, call coordination, and inter-store messaging

Tech Implementation & Support

- Developed and deployed internal tools to automate sales analytics and inventory tracking
- Led technical troubleshooting for store equipment, reducing downtime and improving staff productivity
- Maintained and upgraded store systems, ensuring secure and smooth day-to-day tech operations

Operations & Logistics

- Streamlined logistics with real-time tracking tools across national locations
- Supported inventory accuracy through a self-built barcode scanning system

Communication & Support

- Provided technical assistance to staff and management
- Managed system-related queries from HQ and provided feedback on process improvements
- Liaised with national teams for stock transfers and high-demand item fulfilment
- Managed customer communication via phone and email for special orders and follow-ups
